

Life Safety Code Course

Summary:

A four day classroom and practical experience educational course will focus on developing an understanding, interpretation, implementation and application of the NFPA®'s 2015

Goals and Objectives

By the end of this course, participants will understand how to interpret and apply the key concepts of the NFPA®'s 2015 Life Safety Code® to improve the safety of their facilities through development of processes and procedures as well as facility maintenance and improvement of their healthcare organization

Classroom sessions will include presentations on:

- Application of NFPA®'s 2015 Life Safety Code® in healthcare facilities
- Means of Egress
- Protection Features
- Building Services
- Operating Features
- Ambulatory Healthcare and Business Occupancies
- Life Safety Documentation to meet regulatory accreditation requirements
- Challenges to Life Safety Compliance
- Life Safety Drawings
